💼 WORK EXPERIENCE

Senior Data Engineer
KBC Bank & Verzekering | Varna, Bulgaria

2023 - current

KBC Group is a Belgian universal multi-channel bank-insurer, focusing on private clients and small and medium-sized enterprises in Belgium, Bulgaria, Czechia, Hungary, and Slovakia.

- Implementing data pipelines and machine learning algorithms for anti-money laundering classification

Full Stack Developer
Concord EU | Sofia, Bulgaria

2022 - 2022

Concord US's european branch. Concord is a consulting firm, focused on large scale clients.

- Part of a 30-person development team, developing the insurance broker portal of UnitedHealth Group (USA)

Full Stack Developer
AutoFix24 | Sofia, Bulgaria

2019 - 2022

AutoFix24.bg is a custom-built eCommerce platform for the purpose of handling enormous product catalogues with efficient search algorithms and upsell/recommendations functionality.

- Developed a Hybrid PHP/WooCommerce eCommerce platform, scaled it to millions of products
- Implemented an automated listing, price and stock synchronization between all suppliers
- Wrote web spiders and data scrapers to gather and enrich auto parts and automobile data

Full Stack Developer
Dalio.io | Sofia, Bulgaria

2020 - 2021

Dalio is an application for online merchants that runs on the local computer. It synchronizes inventory and orders between multiple online sales channels (such as Shopify, eBay, Facebook Marketplace, Amazon, WooCommerce, etc.). You can often find lower prices on one provider's website than on another.

Merchants who take advantage of those differences need software to track changes in price and availability.

- Built on the Electron Framework with React.js
- Automated the Chrome web browser to control user's eBay, Amazon and Shopify accounts in the background
- Implemented advanced in-app analytics to monitor user experience and catch bugs early

Full Stack Developer
DropshipLister.com | Frankfurt am Main, Germany

2016 - 2020

Online retailers, publishing hundreds of items from different vendors, need help speeding up the process and automating repetitive tasks.

Dropship Lister is an extension for Google Chrome Browser that allows the user to copy product listings from any website (images, description, price, features, etc.) and import them into the most popular e-commerce platforms (Shopify, eBay, Amazon , WooCommerce and others).

- Wrote and published a Chrome Extension to the Chrome Web Store
- Extension can copy entire product listings from any eCommerce website with 1 click
- Extension can import copied listings into eBay,Amazon,Shopify, as well as custom built eCommerce sites with 1 click

Back-End Developer
Headreach.io | Sofia, Bulgaria

2015 - 2018

The Marketing and Sales department of any company needs access to the contact details of key people in their sales target's organization.

HeadReach was a web platform that crawled websites, social networks, forums, etc., in order to collect publicly available contact information of managers at medium to large enterprises.

This database could then be searched by salesmen and recruitment agencies for a monthly subscription.
(HeadReach was acquired by LeadFuze in July 2018)

- Wrote a bot network of proxied web scrapers using Python to collect public company contact details
- Built an easy to navigate website with search functionality
- Implemented credit card and PayPal monthly subscription functionality
